(54) **Method and system for adjusting a hearing device**

(57) A method for wirelessly adjusting one or more hearing devices (1, ..., 3) with a central unit (4) is presented, the method comprising the steps of:

- establishing a wireless network (6) wirelessly connecting the central unit (4) to hearing devices (1, ..., 3), which are responsive to said wireless network (6),
- detecting said hearing devices (1, ..., 3),
- identifying one or more of the detected hearing devices (1, ..., 3),
- selecting one or more of the identified hearing devices (1, ..., 3),
- establishing a wireless link from the central unit (4) to at least one of the identified hearing devices (1, ..., 3), and
- adjusting the at least one identified hearing device (1, ..., 3).

Therewith, an audiologist is able to unambiguously assign one or two hearing devices (1, ..., 3) in a fitting session, even if multiple hearing devices are within the range of the wireless network (6) or wireless transmitter, respectively.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 06 11 2108

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
