(54) Electroplating apparatus

(57) An electroplating apparatus is provided which includes a solution tank which has at least a bottom plate and a side plate and inside which electroplating solution is poured and a cathode plate and an anode plate which are horizontally placed so as to face each other in the electroplating solution in the solution tank, in which one plate of the cathode plate and the anode plate is an object to be electroplated and placed in a lower position than the other plate, in which an opening through which the cathode plate and the anode plate are inserted into the solution tank is provided in the side plate of the solution tank, and in which a shield plate which is detachable shields the opening of the solution tank.

FIG. 1

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
