(54) **Device for draining recreational vehicles**

(57) The system according to the invention for draining sewage from vehicles (14) comprises: a) a transit surface (102) on which vehicles (14), such as coaches or campers, can pass and stop; b) a collecting tank (1) arranged on the transit surface (102) and comprising in turn a collection area (100) arranged to collect and contain sewage drained from the vehicle (14) located above the same collection area. The collection area has such

a size that it extends over at least half the predetermined maximum width (L_{max}) of the vehicle. A vehicle can transit above the collecting tank (1) with at least one wheel resting upon the collection area. This facilitates the manoeuvres for bringing the vehicle (14) to the draining position, and allows eliminating the grids covering the draining area (14), as well as better cleaning and sanitising the tank (1).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 06 11 1659

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
