### (54) Lighting device with an asymmetrical light distribution

(57) The present invention relates to a lighting device (10) with an asymmetrical distribution, of the type comprising a box-shaped body (14), on which a shield (12) is applied on one of its sides for the passage of light and inside which there is at least one light source (16), comprising, in an intermediate position between the at least

one light source (16) and the shield (12), a mask (19), a portion (18) of which is open to allow the passage of light, in which the inner walls, or their portions which by reflecting the light can direct it towards the area to be excluded from the light distribution, are covered with a black antireflection element (21).

ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.

EP 06 11 2880

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
