(54) **Apparatus for releasable fixation of tiles to a tile support board**

(57) A tile (401) having a front face (202) for displaying and an underside (203) for securing to a tile support surface, the underside having a closed path seal wall (204) extending backwards. The seal wall is configured to provide a seal between the tile and a tile support surface to prevent substance ingress interior of the closed path of the seal wall. A tile having a seal wall also configured to provide a seal between the tile and a second like tile. A tile having an underside that presents tile coupling means configured to communicate with tile support coupling means to provide a first releasable coupling arrangement. A tile support board (404) having a rear face for securing to a support surface and a front face providing a tile support surface and presenting tile support coupling means, such that the tile may be releasably coupled to the tile support board.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 06 25 2685

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
