(54) **Tool box**

(57) This tool box (10), comprises:
a first housing (1) having a first containing space (501) and a first side surface (402) comprising at least one segment enclosing the first containing space (501), and a first jointing edge (404);
a second housing (2) having a second containing space (502) and a second side surface (403) comprising at least one segment enclosing the second containing space (502), and a second jointing edge (405) opposing the first

jointing edge (404), wherein the jointing edges (404, 405) are connected to each other in a rotatable manner to pivot the first housing (1) to the second housing (2) about a pivot axis (6) therebetween; and
at least one latching device (3) arranged on both the first side surface (402) and the second side surface (403) to be movable to a locked position, wherein the latching device (3) locks the first and the second housings (1, 2) to form an aligned arrangement with the first housing (1) co-planar with the second housing (2).
