(54) **Apparatus for remotely operating crane apparatus, crane apparatus, and system for remotely operating crane apparatus**

(57) There is provided a remote-operating apparatus for remotely operating a plurality of crane apparatuses performing loading and unloading in a container yard. The remote-operating apparatus includes a reception unit for receiving video signals showing loading and un-

loading states transmitted from the plurality of crane apparatuses; and a monitor for displaying an image based on a received video signal. The identification information of the crane apparatus that has sent the received video signal is displayed in part of the image displayed on the monitor.
