(54) **A sealing cap for radiator elements**

(57) A sealing cap (4) for radiator elements (8), suitable for hermetically sealing an end (12) of radiator elements (8). The cap (4) is mounted with a snap-wise connection, obtained by a connecting element (32, 76) with-

out using threaded connecting means. The fluid seal is ensured by a seal (28) associated to the cap (4) which therefore does not need the interposition of adhesives or sealers between the cap (4) and the radiator element (8).
