(54) **Human feedback using parasitic power harvesting of RFID tags**

(57) The present invention is directed toward secure access systems. Specifically, a radio frequency (RF) enabled device (116) is provided that includes an RF pow-

ered human feedback element (228). An interrogator emitting an RF field (128) may control the human feedback element through the RF field such that information may be transmitted from the interrogator to the device.
