(54) **Method and device for pressing scrap**

(57) Method and device (10) for pressing scrap comprising a first loading step, wherein a loose and incoherent mass (14) of scrap is loaded onto a pressing base (11), on a first pressing cover (12) and a second pressing cover (13), a second pressing step, wherein the first pressing cover (12) and the second pressing cover (13) cooperate with each other in order to press the mass (14) towards the base (11), and a third compacting step,

wherein the second pressing cover (13) cooperates with its top (19) with an inner surface (15) of the first pressing cover (12), in order to define a desired compact mass (24) of scrap. The first pressing cover (12) and the second pressing cover (13) are associated on opposite sides with the base (11). In the second pressing step, the first pressing cover (12) cooperates with its top (16) with an inner surface (17) of the second pressing cover (13).
