(54) **Coin delivery device and coin delivery device of coin processing apparatus**

(57) A first object of the present invention is to provide a coin delivery device which, even when coins of a plurality of denominations having a large difference in diameter are mixed, can sort the coins one by one for delivery.

A second object of the present invention is to provide a coin delivery device in which a dispensing position of a coin can be freely set.

A third object of the present invention is to provide a small coin delivery device.

In a coin delivery device which holds coins in sorting concave portions arranged in an upper surface of a rotary disk where only one coin can be positioned and which sorts the coins one by one and then transfers them to a coin conveyer, the concave portion is provided with a moving member movable in a diametrical direction of the rotary disk, and the moving member is moved in the diametrical direction when the coin is transferred to the coin conveyer.
