(54) **System for controlling at least two environment protection devices via multi-channel radio transmitters**

(57) The system consists of at least two environment protection devices (1) (5) each comprising at least one motor (2) (6) and a control card (3) (7), each control card comprising a radio receiver (4) (8) tuned to at least one

channel of at least one multi-channel radio transmitter (9). The multi-channel radio transmitter is provided with a microprocessor (17) comprising a program (20) that allows activation or deactivation of the use of the individual channels of the multi-channel radio transmitter.
