(54) **Locking arrangement for a door**

(57) A locking arrangement with a locking mechanism (15) for a door (2) comprises a crossbar (24) rotatably mounted in the door (2) and connected in a conventional manner to a lock bolt (7) or cremone bar in the door, and a handle (6) for rotating the crossbar (24), the locking mechanism (15) comprises a first coupling (25, 28) having two coupling parts (25, 28) for bringing the crossbar (24) into and out of engagement with the handle,

a second coupling (21, 26) having two coupling parts (21, 26) for bringing the crossbar (24) into and out of engagement with the handle, an electrically operating first actuator (31) for engaging and disengaging the first coupling, and a manually operated second actuator (16) for engaging and disengaging the second coupling. The locking arrangement has a simple structure and can be activated by means of both a fingerprint and a code and manually by a key.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 06 12 1649

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
