(54) **Passenger ship in particular a cruise ship and cabin assembly for passenger ship**

(57) Passenger ship, in particular a cruise ship, which extends over several decks (1, 2) equipped with a plurality of cabins (3) and fitted out with service rooms and premises for public use. The cabins (3) are structurally connected in pairs in the form of assemblies (4) provided with two parallel side walls (5) and a dividing wall (6) arranged so as to separate the two cabins (3) and having at least two non-aligned sections (7, 8) substantially parallel to the side walls (5) and each facing a bed (L) of a corresponding cabin (3) and at least partially offset with respect to a mid-plane (M) of the assembly (4), parallel to the two side walls (5). By so doing the volume of one cabin penetrates inside the volume of the other cabin, allowing a reduction in the overall width of the cabins. The assemblies (4) are arranged on each deck along the two flanks of the ship with the side walls (5) alongside each other.
