(54) **Medical apparatus**

(57) A medical apparatus is provided with an electrical circuit (17) for connecting together at least one powering battery (16) and a respective operating unit (10, 15), a magnetic switch (18) mobile between an open position and a closed position of the electrical circuit (17),

a boxed container body (7) adapted to accommodate within the battery (16), the electrical circuit (17), and the magnetic switch (18), and a magnetic actuating device (19) arranged outside the boxed container body (7) for maintaining the magnetic switch (18) in its open position of the electrical circuit (17).
