(54) **Hinge particularly for a door or shutter**

(57) A hinge (1), particularly for a door, in particular of the reinforced type, or for a shutter, comprising two or more arc-like elements (3), which are approximately annular sector-shaped in plan view and are mutually stacked and slidingly associated; the two or more arc-like elements have means (10) which are adapted to limit their mutual sliding from a closed position, in which they are mutually superimposed, to an open position, in which they are mutually offset so as to determine as a whole, in plan view, an angle which can vary from approximately 180° to approximately 360°.
