(54) **Anchoring structure particularly for radiators**

(57) An anchoring structure, particularly for radiators, which includes a supporting device, which can be anchored to a wall and can be detachably associated with a radiator in order to keep it in a condition for use, in which the radiator is hung and is substantially parallel to the wall. The particularity of the present invention resides in that the supporting device has an engagement member, which is adapted to detachably clamp at least one tubular portion of the radiator and cooperates with a supporting member, which can be anchored to the wall and can be detachably associated with the engagement member, and with a spacer means suitable to determine and correctly maintain the condition for use described previously.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 07 00 3304

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
