(54) **Plate for the passage of a pipe through structured roofing material**

(57) The invention relates to a base plate (1) for a passage of a pipe through a roof of structured roofing material, particularly through a roof made of structured roofing elements, comprising a collar surrounding the pipe and a flange to be in contact with the roofing material. The invention is characterized in that the flange is de-

signed to be mounted and fastened underneath the roofing element (10) so that the collar (4) will project out from a hole made in the roofing element (10), and the flange (3) comprises a deformable front portion (5) which is deformable to follow the profile of the roofing element (10), onto which the front portion (5) is mountable.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 07 39 7010

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
