(54) **Structure of post for use in marine and lake environments**

(57) Structure of post for use in marine and lake environments comprising at least a driving element to be at least partially driven into the depth of said environment, at least an emerging element to emerge from said environment and connecting means to connect said driving element and said emerging element so as to make it possible to set up said driving element according with lasting constructive solutions and to make said emerging element of materials typical of said environment. Thanks to this solution, the structure solves the drawbacks encountered in the prior of the art because it combines the positive aspects of wooden posts and of prefabricated posts.
