Remarks:  
This application was filed on 24 - 08 - 2007 as a  
divisional application to the application mentioned  
under INID code 62.

(54) **FLAME RETARDANT FIBER REINFORCED COMPOSITION WITH IMPROVED FLOW**

(57) A composition comprising at least one high Tg  
amorphous resin with a fibrous filler shows improved melt  
processability. Addition of a sulfonate salt to the compo-  
sitions gives increased melt flow as well as enhanced

flame retardancy in a composition which is substantially  
free of bromine and chlorine.
