(54) **Decorative radiator**

(57) The invention concerns a decorative or furnishing radiator, including a front heat radiating panel (11), with both front and rear faces and some heating elements closely coupled and in direct heat exchange contact with the rear face of the front panel. The rear face of the front panel has some grooves (13) and the heating elements are made up of several small pipes (12), in terms of diameter, in which a heat transfer fluid flows, partially or totally set in the above mentioned grooves and closely in contact with the panel.
