(54) **Illumination Device**

(57) An illumination device (2) includes a reflective cover (21), at least one light emitting diode (LED) (22), a first electrical conductive body (23) and a second electrical conductive body (24). The reflective cover has an opening, and the LED is disposed therein. The first ends of the first electrical conductive body and the second electrical conductive body are respectively electrically connected to the LED.
