(54) **Sticker with fixed release layer**

(57) The invention relates to a label, comprising a top sheet and a bottom sheet. The bottom sheet has a bottom surface and a top surface. The bottom surface of the bottom sheet is provided with a self-adhesive layer for sticking to a substrate. The top sheet has a bottom surface and a top surface. The top sheet is stuck to the bottom sheet with the under side facing downwards. The top sheet has a first tear line and a second tear line, which are located at a distance from one another. That part of

the top sheet which lies between said tear lines forms a removable part which can be torn off the top sheet by tearing along the tear lines and can thereby be removed from the label. A release layer is located between the removable part and the bottom sheet, to which release layer the removable part is releasably bonded by a self-adhesive layer provided on the bottom surface of the removable part. The release layer is permanently attached to the bottom sheet.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 07 11 2235

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
