(54) **An article formed of sheets, associated with an object**

(57) An article such as a notebook (10), a notepad, a record book, a printed book or the like comprises a plurality of sheets (12) enclosed by a cover (14), and two outer covers (16, 18) joined together so as to form a pouch (26) which contains an object (24). The outer covers (16, 18) can be made from transparent material, or

from translucent or non-transparent material. In the latter case, they prevent the viewing of the object (24) contained in the pouch (26), which can thus have the properties of a surprise. The outer covers (16, 18) are advantageously removable, so that they can be removed before or after the object (24) is taken out of the pouch (26).
