(54) Box assembly for a roll-up awning

(57) The box assembly comprises a casing (1) comprised of first and second elongated members (2, 3) defining an encircling wall and having respective mutually coupled adjacent first longitudinal edges (2a, 3a) and respective mutually separated second longitudinal edges (2b, 3b) defining a longitudinal opening (4) therebetween, and two closing plates (5) fixed to ends of said first and second elongated members (2) by respective first and second fixing elements (6, 7). Said first longitudinal edg-

es (2a, 3a) of the first and second elongated members (2, 3) comprise respective mutually coupling configurations adapted to allow relative movement of the first elongated member (2) in relation to the second elongated member (3) enough to provide an access to the inside of the casing (1) when said first fixing elements (6) are removed, while said second fixing elements (7) remain coupled and keeping the second elongated member (3) fixed to the closing plates (5).

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 07 38 0241

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
