(54) **Quick fixing system for lighting devices**

(57) A quick fixing system for a lighting device of the type comprising at least one first component (10), like for example a support prearranged for wall and/or ceiling installation, and at least one second component (12), like a ceiling light fixture, which can be coupled to the first component (10). On the portion of the second component (12) adapted to adhere to the first component (10), a coupling element (18) cooperating with a corresponding coupling element (26) made on the first component (10),

and one or more locking elements (20), respectively cooperating with one or more locking elements (30) made on the first component (10), are provided. The joining of the coupling elements (18) and (26) forms a hinge around which the second component (12) rotates in order to adhere and be fixed to the first component (10) by means of the locking elements (30), thus allowing the quick and secure/error-free installation of the second component (12) on the first component (10).

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 07 11 9079

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
