(54) **Stretch film particularly for palletizing and method for manufacturing the film**

(57) A stretch film particularly for palletizing, constituted by strips (11, 12, 111, 112) of plastic film (15) which are arranged side-by-side and are contoured so as to

have regions (13, 113) where their edges overlap the adjacent edges of the nearby strips; the joining of the overlap regions (13, 113) allows to form the film (10).
