(54) **Grinding machine for ceramic tiles**

(57) The present invention has the object of a grinding machine for ceramic tiles (1) of those used in the ceramic piece manufacturing industry and, more specifically, tiles, to guarantee that the facing sides of the pieces are parallel to each other and that the adjacent sides

are perpendicular, where the grinding machine does not need an additional supply of water since the temperatures that are reached therein are not high and, furthermore, presents a series of grinding discs (7) placed in each grinding section at different heights that guarantee a single cut of surplus material.
