(54) **An electronic transaction and application terminal with visual identification checking capability**

(57) An electronic transaction or application terminal which can collect visual data including the image of the person using it captured during such usage, the image of the user's signature presented by the user during such process by use of a signature pad, and the images of the identification card presented by that person during the transaction or application process, in order to reliably determine the identity of the user, without requiring the usage of machine readable cards and associated PIN numbers.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 08 10 2196

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
