(54) **Cooking appliance**

(57) A cooking appliance comprises a main body housing at least one oven, a hob mounted on the top of the main body which includes at least one heating region, a heat deflecting baffle which is provided within the main body and which substantially partitions the oven from the hob, one or more airflow control openings which are provided in the baffle and which permit air to flow in a con-

trolled manner from the side of the baffle facing the oven to the side of the baffle facing the hob, a fan which draws air into the region of the main housing on the oven side of the baffle. At least two vents are provided with one on the hob side of the baffle through which air in the hob region can escape the main body, and at least one further vent on the oven side of the baffle through which air can escape the main housing.
