(54) **Transportable and extensible cabin with extraction system**

(57) According to the invention we are going to construct a movable extensible tunnel like extraction system constituted by an extraction wall joint to a sliding sectors covering, able to contain the overall size when the sectors are superimposed and to have efficiency characteristics analogue to traditional extraction walls equipped by a not movable covering. The invention comprises also the possibility to move the system as a whole in a very simple and efficacious way when the covering is closed, due to special slits for the lifting fork of an elevator or similar.

INCOMPLETE SEARCH			
The Search Division considers that the present application, or one or more of its claims, does/do not comply with the EPC so that only a partial search (R.62a, 63) has been carried out. Claims searched completely : Claims searched incompletely : Claims not searched : Reason for the limitation of the search: see sheet C			
Place of search The Hague		Date of completion of the search 19 July 2010	Examiner Porwoll, Hubert
CATEGORY OF CITED DOCUMENTS		T : theory or principle underlying the invention E : earlier patent document, but published on, or after the filing date D : document cited in the application L : document cited for other reasons & : member of the same patent family, corresponding document	
X : particularly relevant if taken alone Y : particularly relevant if combined with another document of the same category A : technological background O : non-written disclosure P : intermediate document

EPO FORM 1503 03.82 (P04E07)

**INCOMPLETE SEARCH
SHEET C**

Application Number

EP 07 01 8692

Claim(s) completely searchable:
1-5

Claim(s) not searched:
6

Reason for the limitation of the search:

Independent claim 6 includes the statement " All of it as described and represented". This is a reference to the description and the drawings. This reference is not absolutely necessary: independent claim 4 has the same wording as claim 6 but without this reference to the description and the drawings. Therefore claim 6 contravenes Rule 43(6) EPC (cf. also Guidelines C-III-4.17).

Furthermore it cannot be derived from this reference to the description and the drawings which characteristics of the extraction wall system disclosed in the description and the drawings are included in the subject-matter of claim 6, thus rendering the subject-matter unclear (Article 84 EPC) to the point that no meaningful search other than the one already performed for claim 4 is possible.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 07 01 8692

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
