(54) **Revolving eyelash mascara device**

(57) The present invention is about a revolving device for applying mascara. The device is provided with a button so that when said button is pressed, the mascara brush starts to turn. This brush performs the make up function at an advised speed between 60 and 120 r.p.m. The brush is placed under the eyelashes to start to make them up. Some of the advantages of the device are that it curls and expands the eyelashes and that it provides a uniform finish make up.
