(54) **Pile board for a printing press**

(57) A pile board is provided for a printing press, which is waste-free and easy to handle. The sheet pile board (1) comprises a base (10) formed with a resin having a piling face (12) on which the printing media are piled up, and grooves (11) formed on said piling face into which a supporting member can be inserted to support the printing media, and there being a metallic reinforcing member

(20) provided in the base (10). The sheet pile board (1), wherein the base (10) is formed with resin, has a lower strength than that of a wooden base, but is significantly strengthened because four metallic pipes (20) are buried in the rear face of the base. Even when piling up a large quantity of heavy printing media, the sheet pile board (1) is properly piled with them and supports them without bending.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 08 25 1768

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
