(54) **Scaffold with lockable leg**

(57) A scaffold including a plank (1) to support a person thereon, the plank having opposite plank ends, the scaffold further including leg units (2), each leg unit being coupled to an associated plank end by a hinge structure at each lateral side of the plank end, so that each leg unit is pivotal between an extended position and a collapsed

position, each hinge structure including a first hinge part (5) connected to the plank end and a second hinge part (10) connected to the leg unit, as well as a pivot axis between said hinge parts, each hinge structure further including a latch mechanism to retain the leg unit in at least its extended position.
