(54) **Device for ergonomic handling of an implement, and cleaning implement**

(57) The invention relates to a device (2) for ergonomic handling of an implement (19), such as a mop, with an elongated stale (1). A first end of the stale faces the user and a second end of the stale faces the implement. The device comprises a handle (9, 13) between the ends of the stale for the hands of the user, and a support (3) for resting against the user's body at the first end of the stale. The invention further relates to an ergonomic cleaning implement.
