(54) **Adjustable hinge support and method for adjusting the position of said support**

(57) Adjustable hinge support designed to allow rotation of a leaf, in particular a gate, comprising a support plate intended to be fixed to a pillar, an internally threaded bush which is inserted inside an eyelet formed in the plate and has a threaded inner surface inside which the shank of the eye-piece of the hinge engages and a threaded

outer surface on which an adjusting ring engages, said ring being able to be fixed at the desired height by means of retaining grub screws. A tightening ring is also envisaged, said ring being engaged by means of screwing on the shank of the eye-piece and being able to fix the latter against the bush, coming into contact against the free edge of the said bush.
