(54) **Wearable bag with security defense**

(57) The present invention pertains to a wearable bag (5) comprising a body (51) divided by two panels (51a,51b), two shoulder straps (52) respectively disposed on two panels, and a zipper (53) with two zipper tracks (531) and two zipper tabs (532,533). Particularly, the body has a plurality of pockets (54) disposed therein, which are sewed to the front side thereof; further the panels (51a,51b) are interlocked to form a bag (5) with the shoulder straps (52) by the zipper tabs (532,533) sliding toward the same direction along the zipper tracks (531); relatively, the panels are detached to form a wearable vest while the zipper tabs slide toward a reverse direction. As a result, the present invention provides with multiple uses for the conversion of a bag and a vest and also facilitates to decrease the possibility of robbery for increasing the security defense.
