(54) **Adjustable leaf hinge part**

(57) The invention concerns an adjustable leaf hinge part (1) of a hinge for doors or windows, comprising a support part (3) to be secured to a leaf and an adjustment part (4) having a receiving means (33) for a hinge pin, wherein the adjustment part (4) is guided displaceably on the support part (3) in a horizontal adjustment direction.

The object of the present invention is to provide a simple leaf hinge part which is inexpensive to produce.

That object is attained in that at least the mutually co-operating portions of the support part (3) and the adjustment part (4) comprise flat steel sheets, wherein at least one projection is bent out of the flat sheet of at least one of the two parts (3 or 4) of the leaf hinge part (1), which projection forms at least one guide surface which extends in the adjustment direction and which bears against a guide surface of the other of the two parts (4 or 3) so that the adjustment part (4) is fixed to the support part (3) transversely with respect to the adjustment direction.

ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.

EP 08 16 2907

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
