(54) **Improved panel curtain system with co-acting profiles**

(57) The invention relates to a system for attaching a window covering such as a panel curtain to a rail, which system comprises a first profile which is provided on the upper side with runners adapted to be at least partially received in the rail, and which further comprises means for attaching the window covering. According to the invention the system comprises a second profile which is adapted for releasable attachment to the first profile, wherein the means for attaching the window covering are arranged on the second profile.

The invention also relates to a panel curtain system comprising a rail, one or more panels and one or more of such systems.
