#### (54) Radiator with radiating plate having high efficiency

(57) The radiator (1) with radiating plate (2) having high efficiency comprises a plate (2) that bears at least one manifold (3, 18) whereto is fastened at least one tube (4) for conveying a heat-carrying fluid. The plate (2) presents at least one groove (6) in which is inserted the

tube (4). The tube (4) and the groove (6) present at least one coil portion (11) defined by a plurality of first segments (12) substantially parallel to each other and able to assume a substantially horizontal position when the radiator (1) is installed, and second segments (13) interposed between said first segments (12).

#### ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 08 16 5160

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
