(54) **Gas engine and gas-engine-mounted working machine**

(57) A gas engine (11) is driven by fuel gas supplied from a cassette gas canister (18), and includes a vaporizer device (46) provided between a cylinder block (42)

and a muffler (16). The vaporizer device (46) vaporizes liquid fuel gas, led out from the cassette gas canister (18), using heat of exhaust gas discharged from the cylinder block.
