(54) **Improved flush-mounted cabinet**

(57) Improved flush-mounted cabinet for containing headers and/or valves of heating installations, and accessories, which comprises two plate-like feet which can be mechanically associated at an adjustable height with two sides walls of a box-shaped body defining a containing compartment; and a transverse front piece which can be removably mounted on the front of the box-shaped body at the bottom thereof. Each of the plate-like feet is able to slide by means of a guide along a bottom section of the said side walls to which it can be secured in an adjustable position by means of fixing means.

The front piece is provided with two engaging members situated in the vicinity of the two ends and able to be removably inserted by means of forced engagement inside aligned openings provided in the edges of the feet.
