(54) Tank and elastic profile for such a tank

(57) The present invention relates to a tank comprising a plurality of prefabricated concrete elements (2) positioned side-by-side forming an essentially cylindrical tank (1) having a plurality of vertical joints (5) in the form of toggle articulations between the aforementioned plurality of prefabricated concrete elements (2). The tank (1) further comprises an elongated elastic profile (7) positioned in at least one of the aforementioned plurality of vertical joints in the form of toggle articulations, whereby a cross section of the aforementioned elastic profile (7) comprises a central part and two outer parts (9), the aforementioned central part (8) being homogeneous and the aforementioned two outer parts (9) being inhomogeneous.

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
