(54) **Multi-layered profile for frames for doors, windows and suchlike**

(57) A multi-layered profile for door and window frames comprising an external covering layer (11), an internal covering layer (12) and an intermediate connection layer (13) between the external covering layer (11) and the internal covering layer (12). The intermediate connection layer (13) comprises a cross section shape d so as to define on a first side at least a first seating (17) open toward the external covering layer (11), and on a second side, opposite the first side, at least a second

seating (17') open toward the internal covering layer (12), wherein with each of the at least one first and at least one second seating (17, 17') a corresponding rapid coupling element (14) is associated, able to cooperate with the internal covering layer (12) and with the external covering layer (11) so as to achieve a removable coupling both of the external covering layer (11) and also of the internal covering layer (12) with the intermediate connection layer (13).
