(54) **Method and apparatus for transmitting/receiving control information in a wireless communication system**

(57) A method and apparatus for transmitting/receiving control information in a wireless communication system are provided, in which signaling information having a fixed number of bits is received in a coded block of a

received frame, and signaling information having a variable number of bits in at least one coded block of the received frame is decoded using the signaling information having the fixed number of bits.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 09 15 5472

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
