(54) **Tubular handle for doors and windows**

(57) Tubular handle for doors and windows with fixing means for connection to a sidewall of a door or window. The fixing means are formed by means of a sliding element projecting from the inner surface of the tubular body of the handle and engaging inside a track formed externally on a boss piece inserted inside the tubular body and fastened to the sidewall by means of a pin inserted inside an axial seat thereof and fixed by means of screwing to a threaded rod rigidly fastened to the sidewall of the door or window by screwing of said pin. At the end of the travel path of the track, through-holes provided in the boss piece and in the tubular body are aligned for insertion of a grub screw which can be inserted inside an annular recess of the pin.
