(54) **Shutter-stop device for hinges with removable hinge-pin**

(57) A shutter-stop device for a male hinge (6) with removable hinge-pin, comprising a part that is able to turn with the leaf (2) and is designed to co-operate with a non-turnable part associated to the male hinge (6) for blocking the leaf (2) when it is in the open position.

Said device comprises, in combination: a top element (5) designed to turn fixedly with a female hinge (4) of the leaf (2); and a bottom element (7) that can slide axially on the fixed male hinge (6) that prevents rotation thereof. Said top element (5) is designed to engage automatically with said bottom element (7) for blocking the leaf (2) in the open position, and to disengage from said bottom element (7) when the latter is actuated by the user for releasing the leaf (2).
