(54) **Door wing**

(57) The present invention refers to a door wing preferably to a device for preventing a door wing from warping, said device comprising at least one clamping rod arranged within the said door wing. It is provided for, ac-

ording to the present invention, that each free end of a clamping rod (10) comprises a thread (11, 12) where a nut (13, 14) can be threaded on. Said clamping rod (10) is inserted into a through-hole (5) being provided for in a door wing (1) well before the door wing (1) is finished.
