(54) **Device installable in a vehicle for generating a rescue request and automatic sending of information on the geographical position of the vehicle**

(57) A device that can be installed on board a vehicle, for request for rescue and automatic sending of information on the geographical position of the vehicle comprises, in combination: GSM/GPRS communication means and corresponding antenna; means for receiving the signals of the GPS system and corresponding antenna; a crash sensor; handsfree communication means; at least

one loudspeaker; at least one microphone; at least one pushbutton for manual calls; and electronic components necessary for supply and control.

Said GSM/GPRS communication means are designed to communicate with a purposely provided operating centre designed to provide the rescue service and/or for sending useful information.
