(54) **Support element for signs and the like**

(57) The support element for signs (10) and the like of the present invention constitutes a fastening system which is simple, effective and easy to place and change its position in display stands (9) with form of rods (8) whereon the products are hung without needing to have to use any type of tool, permitting a great versatility in

the size and shape of the signs (10) to be fastened and which basically comprises a body (2) which has an open lateral slot (3) at one of its ends to introduce in the sign (10) and at its opposite end a housing (4) whereinto is solidly attached another body (5) with a central orifice (7) of suitable dimensions to surround the rods (8) of the display stand (9).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 09 38 2083

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
